

AMENDMENTS TO THE SPECIFICATION

Please replace the Abstract with the following amended Abstract:

~~Provided is an~~ An ink-storing member for a writing instrument which can inhibit deterioration in the ink itself caused by permeation of oxygen and nitrogen contained in air, inhibit leaking of the ink and generation of bubbles, enhance discharge stability of the ink, improve fragrance retention of a perfume-containing ink, prevent inferior writing brought about by reduction in an internal pressure of an ink-storing vessel in a pressure type writing instrument and prevent deterioration in the ink due to vaporization of moisture of a water-based ink and deterioration in the ink caused by moisture absorption in an oil-based ink. Such ink-storing member ~~for a writing instrument~~ includes, for example, an ink-storing member for a writing instrument which is constituted of a multilayer structure ~~comprising~~ having an organic high molecular compound layer constituted of an organic high molecular compound an inorganic compound layer constituted of an inorganic compound.
